

## TESTIMONIALS

“As someone who has personally benefited hugely from osteopathic treatment and who specializes in working with children, I think it is fantastic that Baby Check is now available to increase access for young babies to an osteopathic assessment and treatment, and that it is provided in a group setting that is so supportive and positive.”

Dr. Neil Simpson (Consultant Paediatrician)

“As a health professional with 33 years of experience working with infants, children and carers specializing in physical and mental health, I would have no hesitation in recommending the very professional service offered by the registered osteopaths at Baby Check Bath. I find the expert service they provide invaluable to babies that have difficult births and feeding problems.”

Georgina Stanton (Health Care Professional)

“I can't recommend Baby Check highly enough. The treatment offered to Ruby was superb with excellent results.”

Hannah (mother)

HELP US  
TO HELP  
BABIES  
THRIVE

## OUR VISION...

Baby Check Bath is a pioneering not-for-profit Community Interest Company dedicated to providing a free osteopathic service to babies whose families would not otherwise be able to afford it. These babies are often very distressed, cry for long periods of time, and are difficult to feed and soothe. Their early weeks can be very distressing both for them and for the whole family.

Previous studies have shown that osteopathy can play an important role in helping these babies to feed and thrive. This is of benefit to the whole family and enables everyone to better enjoy those first few weeks of life.

## RESEARCH

We are running a research project alongside the clinic to evaluate parents' perception of osteopathic treatment for infants aged 0 – 3 months.

The clinic started in January 2015 and the results of the evaluation are extremely positive. Baby Check currently treats 24 babies each week and is already oversubscribed.

We are dedicated to developing communication with other Health Professionals – Health Visitors, Midwives, Lactation Consultants, Pediatricians – to create an exemplary model of best practice for the care of newborns and infants.

For more information see our website  
[www.babycheckbath.org](http://www.babycheckbath.org)

The seeds of this project have already been sewn.

## PLEASE HELP US GROW!

## THIS YEAR WE NEED TO RAISE £50,000

This will cover the cost of the services of the Osteopathic Clinic Consultants, administrative and office costs. These services will guarantee a professional, sustainable clinic for the babies.

Babies under 3 months are signposted to Baby Check by the health professionals involved in their care.

The average cost for a course of treatment for one baby is £200.

Any contribution, however large or small, is very welcome.

## IN THE LONGER TERM...

we want to expand the service to meet the obvious demand, and continue to collect data that will help us demonstrate the role osteopathy can play in the treatment of babies.
